Hearing Loss Impacts Health and Productivity

3M™ PELTOR™ Brings You Hearing Protection and Communication Solutions for Noisy Environments

Hearing loss is the most commonly recorded occupational illness in manufacturing, accounting for one out of every nine recordable illnesses. Since 2004, the Bureau of Labor Statistics (BLS) has reported that nearly 125,000 workers have suffered significant, permanent hearing loss. In 2009 alone, BLS reported more than 21,000 hearing loss cases.**

This is a problem for both employers and their workers since hearing loss can impact the employee's quality of life and their work productivity.

3M PELTOR has been providing hearing protection and in-noise communication solutions for more than 40 years. When choosing a communication solution for use in noisy environments requiring hearing protection, choose 3M PELTOR, a respected and trusted leader in the safety products industry.

Hearing protection with built-in AM/FM radio

Hearing protection for communicating with external two-way radio

Hearing protection with built in two-way radio

Hearing protection with level-dependent function for environmental listening limited to max 82 dB

Hearing protection with external audio input

Bluetooth wireless technology

3M™ PELTOR™ Communications Headsets

3M™ PELTOR™ Lite-Com BRS Headsets

Communication Simplicity, All-in-One Productivity

Enhance employee safety and communication in noisy environments with a 3M PELTOR Lite-Com Two-Way Headsets. It features UHF two-way radio technology integrated into the headset for an all-in-one design simplifying communications between workgroup members. An efficient alternative to conventional portable radios.

Features and Benefits

- 8 pre-programmed BRS channels and 38 CTCSS sub-channel settings
- Ghost voice menu prompts for easy mode selections
- Operates with 2 AA batteries (Rechargeable battery pack sold separately)
- Push-to-Talk (PTT) or hands-free Voice-Activated (VOX) transmit functions
- Federal Communications Commission (FCC) Narrow band mandate compliant
- Operates on communications frequencies that are subject to FCC and/or Industry Canada (IC) Rules & Regulations.*

3M™ PELTOR™ Communications Headsets

3M™ PELTOR™ HT Series Listen-Only Headsets

High-Performance Protection for Noisy Environments

The 3M PELTOR HT Series Listen-Only Headset offers clear sound reproduction and communication in noisy environments. Its durable design provides comfortable, long-term use under tough conditions. A wide selection of connectors enables it to be used with speaker microphones, VHF/UHF radios or personal entertainment devices.

Features and Benefits

- Wide, padded headband for all-day comfort
- Deep earcup design for increased ear room
- Earcups with liquid and foam-filled comfort cushions
- Standard 3.5MM plug connects to a variety of devices including shoulder mics and MP3 players

3M™ PELTOR™ In-Ear Communications Headsets

3M™ PELTOR™ Ora-Tac™

Intelligent Hearing Protection for Improved Situational Awareness

3M PELTOR Ora-Tac is the ideal solution for users that need to maintain their ability to hear while wearing an in-ear hearing protection headset. Environmental microphones are powered by level-dependent technology that electronically reproduces sounds and conversations so users don't need to remove the earbuds to communicate. An in-ear microphone transmits voice commands back over the radio when the Push-to-Talk (PTT) button on the ORA-BASE is activated.

Features and Benefits

- Lightweight, compact design can be worn with eyewear, respirators, hard hats, welding helmets and other PPE
- Soft and comfortable communication eartips available
- 2 radio Push-to-Talk (PTT) buttons and level-dependent volume control
- Communicate without compromised hearing protection

3M™ PELTOR™ In-Ear Communications Headsets

3M™ PELTOR™ HearPlugs™ Listen-Only Earpiece

Virtually weightless design. Powerful protection.

3M PELTOR HearPlugs Listen-Only Earpieces are designed for two-way radio users who must have clear reception of incoming transmissions while working in noisy areas. The earpieces are compact, easy to use and will plug into your two-way radio lapel speaker microphone with an audio accessory jack option.

Features and Benefits

- Easy-to-insert communications eartip allows radio transmissions to pass through, while helping protect hearing
- Soft, acoustic tube comfortably wraps around behind the ear for a snug fit
- Coil allows for head movement and placement
- All HearPlug models come with 1 pair Classic communication eartips and 1 pair UltraFit Communication eartips

3M™ PELTOR™ Communication Headsets

3M™ PELTOR™ Tactical Sport™ Headsets

Tactical Sport headsets provide a natural, realistic sound, giving users the fastest shut-off and recovery time of any shooter earmuff we've ever made. Our sound amplification boosts your ability to hear low level environmental sounds, while still instantly limiting dangerous noises, like gunfire, to lower listening levels.

- Contoured cups for better stock-weld and sight picture
- Automatic shut-off (2 hour) to conserve battery life
- Extra set of orange cups (on the 479 version)
- Amplifies low level environmental sounds
- Digital Sound Suppression technology
- Level dependent function for environmental listening, limited to 82 dB

3M™ PELTOR™ In-Ear Communications Headsets

3M™ PELTOR™ E-A-R buds™ Headphones

Combining hearing protection with clear sound reception, 3M PELTOR E-A-R buds allows users to listen to a wide variety of audio devices while reducing potentially harmful external noise. When employees have their favorite sounds at their fingertips, they'll tune into higher compliance.

Features and Benefits

- MP3 player compatible (devices with a 3.5mm stereo audio jack - smartphone, iPod®, iPad®, etc.)
- Audio muting option lets you shut off the sound at a touch
- Durable lasting cable assemblies ensure long life for your investment
- Output audio limited to a maximum sound pressure level (SPL) of 82 dB

Wireless Aircraft Pushback System

3M™ PELTOR™ Ground Mechanic WS™ Solutions

Pushback Operations Without the Restriction of Wires

The 3M PELTOR Ground Mechanic WS Solutions system is designed for use on airport tarmacs for pushback and ground mechanic service operations. The headset incorporates the latest in both Bluetooth® wireless technology and Digital Sound Processing (DSP) technology. The Bluetooth wireless technology offers untethered flexibility and convenience while the DSP technology enhances noise cancellation for clear communication in high-noise conditions or environments when talking into the boom microphone.

Features and Benefits

- Noise-canceling boom microphone with DSP
- Earcup color for increased visibility in both day and night operations
- Operates with 2 AA batteries
- Voice Activated Transmit (VOX) functionality
- Ghost voice menus in headset
- Cockpit voice prompt notification when connected
- Ground crew confirmation when connected
- Remote volume control adjustment to the pilot
- Aircraft adaptor delivered with *REMOVE BEFORE FLIGHT* flag

Wired Aircraft Pushback System

3M™ PELTOR™ MT Series Ground Mechanic Headset

Headsets with Tethered Pushback Connections

3M PELTOR MT Series Ground Mechanic Headsets are designed to help provide clear communications and comfortable hearing protection during high-noise pushback and ground support operations in many climate conditions.

Features and Benefits

- Folding, leather wrapped headband for compact storage
- Earcup color for visibility in day and night operations
- Military grade, kevlar-reinforced headset download cable 30" long
- Cup mounted Push-to-Talk (PTT) button
- Noise-canceling boom microphone
- Inter-operable with existing extension cables

Military and Tactical Law Enforcement

3M™ PELTOR™ COMTAC/SWAT-TAC Tactical Communication Headset

Advanced Communication for Elite Operations

The 3M PELTOR COMTAC and SWAT-TAC Headsets help provide tactical communication and hearing protection for today's modern military and SWAT team operatives. These headsets have been designed for use with firearms and feature noise-attenuating earcups with environmental microphones for "talk-thru" capability and situational awareness. The COMTAC/SWAT-TAC headsets have been fielded and standardized by numerous DOD and Federal agencies including F.B.I. HRT, USSOCOM and U.S. Army PEO Soldier.

Features and Benefits

- Radio Push-to-Talk (PTT) adaptors with MOLLE clip-on attachment (sold separately)
- Electronic talk-thru technology
- Fail safe Rx/Tx communication mode if batteries deplete during mission
- Interoperability with ACH, FAST and PASGT model helmets
- Noise-canceling, flexible gooseneck boom microphone
- Dual radio Rx/Tx variants available
- Adjustable sizing to fit different users
- Level dependent function for environmental listening, limited to 82 dB

Sounds reproduced from the environmental microphones are limited to 82dB. Peripheral communications and entertainment devices connected to headsets are usually not limited. The user should exercise caution and limit the loudness using the peripheral devices volume control to prevent exposure to unsafe sound levels.

WARNING

When shooting and exposed to impulsive sounds, the severity of exposure is influenced by the weapon, ammunition, number of rounds fired, and numerous other variables. Proper selection, fit and use of the hearing protector is very important. All of these factors make it difficult to predict the required and/or actual protection obtained. Regardless of the hearing protector being worn, the user should be alert to his or her own hearing. If during or after an exposure, tinnitus (ringing or buzzing in the ears) is heard or the user's hearing seems muffled or dulled, or for any other reason the user suspects a hearing problem, the fit, condition or adequacy of the protector should be carefully checked and/or a more protective device or combination of devices (such as earmuffs and earplugs together) should be worn. For those exposed to weapons fire on a regular basis, periodic hearing evaluations are advised.

These hearing protectors help reduce exposure to hazardous noise and other loud sounds. **Misuse or failure to wear hearing protectors at all times when exposed to hazardous noise may result in hearing loss or injury.** This product contains metallic components that may increase electrical hazards. For proper use, see supervisor, Fitting Instructions, or call 3M Technical Service (In U.S.A. call 1-800-243-4630. In Canada, call 1-800-267-4414)

Noise Reduction Rating (NRR):

* Research suggests that many users will receive less noise reduction than indicated by the NRR due to variation in hearing protector fit, fitting skill and motivation of the user. It is recommended that the NRR be reduced by 50% to better estimate typical workplace protection.
